

Hydraulic breakers WH

"State-of-the-art" breaker technology

Housing made from bended parts, no weld seam at the edge

Connectors and boring for central greasing prepared*

Hydraulic impact for a constant acceleration of the piston*

No-load protection by a hydraulic oil cushion between cylinder and piston

Three point tool bearing for an exact tool guidiance and less wear

* valid for the models WH5 up to WH80

ATTENTION: the hydraulic values indicated here after are not to be considered for the regulation of the excavator – please use the instructions!

Further advantages

- ✓ Drum mounted floating, sound and vibration damped
- ✓ Buffer on the housing bottom in addition to lateral buffer elements

No weld seams at the edges, no cracks of the housing

No screw cap, connections easily accessible

Inner socket in different materials available

Robust protective housing for the lubricating cartridge

Especially for the Tunnel version: dust cover
